

Before we speak there are a few things that will help us at our first meeting.

Firstly write a list of what you want done, it can be helpful to have pictures drawings or plans so we can have a better understanding of the ideas you have.

Think about the size of furniture you intend on putting in the space and how you wish to use the spaces, I have an article in the services section on “home design ideas” that may be helpful.

Don't be afraid to ask for *ballpark* figures at this point, as it helps us both quickly find out if it is worth getting a firm quote or not.  
It may also be important at this stage to have looked into finance for the funding of the project.

Consider the time fame it will take to get the job done as there may be a lot of planning required before the work can even start.

If building or planning permits are required then please have available a copy your rates notice or contract of purchase as there is a need to have proof of ownership.

Finally have a look around my web site, you may find some more ideas that will help.
